`class ParentClass { public void addToSet (ParentSet set) {} public void print() {} } class Child extends ParentClass { public void print() {} }`
Why `class Child extends ParentClass {}` is wrong. An other code, is this, what meant?
`class Child extends ParentClass{ public void print() {} void print() { super.print() } }`
A: why `class Child extends ParentClass{ public void print() {} void print() { super.print() } }` is wrong. An other code, is this, what meant?
